

316 Dundee Avenue - Contributing

At this location is a two-story, frame, gable front Italianate dwelling built ca. 1910 and extensively altered in the late 20th century. The house was at one time a wing of the Hough Street School, (as was 308 Dundee Avenue) and has a continuous rock-faced concrete block foundation, a gable roof of asphalt shingles, an exterior end and an interior brick chimney and an exterior of aluminum siding. On the main (E) façade is a two-story, enclosed porch with aluminum siding and three, centrally located, single-light glass and aluminum windows with flanking metal shutters. The main entrance is located in this enclosure and has a ca. 1990, nine-light glass and two-metal panel door with flanking full-length metal shutters. Windows are original, one-over-one double hung wood sash. The house has a wide eave with simple paired brackets. A secondary entrance on the south elevation has an original, single-light glass and wood door with a hip roof canopy supported by wrought iron posts.

At the rear of the dwelling is an original, frame garage with a hipped roof of asphalt shingles, an exterior of aluminum siding and no visible doors. - **Contributing**
